

Internship Opportunity

Montana Department of Transportation Engineering Division

Summer Engineering Internships (11) available in various MDT locations throughout the state. The successful candidates will perform technical engineering and construction-related activities in the Helena headquarters or in district assignments throughout the state.

The successful candidates should be entering their Junior or Senior year in Civil Engineering or a directly-related field, with a combination of interest and/or experience in Civil, Environmental, Geotech or Construction Engineering. Recent graduates may also apply. The successful candidates will gain valuable experience in highway-related civil engineering while participating with other engineering professionals in a teamwork environment.

To apply for these internship opportunities apply online with MDT and refer to Position Number 99998
